

5 steps to a cleaner Pacific

1 Avoid products that you only use once and then throw away.

2 Reduce the amount of waste you generate. Most plastics takeyears to break down.

3 Reuse paper and plastic containers. Use cloth bags or baskets instead of plastic bags.

4 Recycle bottles, cans and paper where you can.

5 Compost your organic waste. In most Pacific countries, more than 50% of the waste thrown away is organic. Return green waste to your garden to make good fertiliser for your plants and food.

2005 Pacific Year of Action Against Waste

Action today - impact tomorrow
