Our Mission

- Connect government policy makers, seabird conservation practitioners and scientists, land managers and communities from all Pacific Island countries and territories working with seabirds.
- Increase our collective understanding of the value of seabirds to Pacific economies and communities including cultural values.
- Highlight conservation and scientific initiatives currently underway or planned, to the benefit of region's seabirds, their islands, and the seas where they occur and to the people of Oceania.

Please register your interest in attending (formal registration will follow) using this QR code:

There you can also take the opportunity to let us know what you would like to get from the symposium - 2024 Oceania Seabirds - and also what you would like to share.

Visit our website in the coming weeks for more information:
