PRODUCT / MATERIAL:	Custom Orb
DESCRIPTION:	
COLOUR:	Windspray
BRAND / NO.:	Lysaght Custom Orb, The Clean COLOURBOND steel,G550 - 0.42mm
MANUFACTURER:	Bluescope Lysaght
DISTRIBUTOR:	Bluescope Lysaght (Fiji) Ltd
OTHER:	Only approved gutters, fasteners (Storm-tite cyclonic roofing fasterber) and accessories to be used.

PICTURE:

THE TRULY IMPRESSIVE STORM-TITE™ CYCLONIC ROOFING FASTENER INCORPORATES ALL THE BEST FEATURES OF ROOFING FASTENERS INTO ONE COMPACT FASTENER.

- Designed, developed and manufactured in Australia.
- The one piece metal assembly consisting of base Hexagon Head screw with integrated 25mm diameter metal flange makes the fastener easier to store, handle and install.
- Large EPDM dome seal, when compressed upon installation, provides a superior weather seal as well as eliminating any metal to metal contact between screw head and roofing profile, which dramatically reduces the risk of scratching and potential corrosion.
- No separate rotating parts which require re-alignment during installation means that construction time, and frustration, are reduced.
- Tested and approved by the Cyclone Testing Station at James Cook University.
- The fastener configuration suits LYSAGHT® Corrugated, TRIMDEK® and MORCALD® roofing profiles as well as ridge caps and barge flashings which means only one screw is required to complete your whole project.
- The compact design greatly improves the final appearance of your project when compared to traditional fasteners.
- Available for metal drilling and timber drilling applications in Class 3 plain and Class 4 plain, and pre-painted in all LYSAGHT® COLORBOND® colours.

Reflecta-GUARD™
Reflecta-Guard™ is our premium insulation product, providing the best R-values in the Green Insulation™ product range. It is arguably one of the most advanced insulation products available in the marketplace and has been used extensively worldwide for a range of project applications. Reflecta-Guard™ incorporates exceptional thermal properties for both heat and cold with significant acoustic dampening features reducing unwanted noise.

Roll Size: 1.5mx20m Coverage: 30m²

Description

Universal Columns also known as UC's or H beams due to their shape. UC's have a width similar to their depth which makes them suitable for column applications where strength needs to be similar in both directions

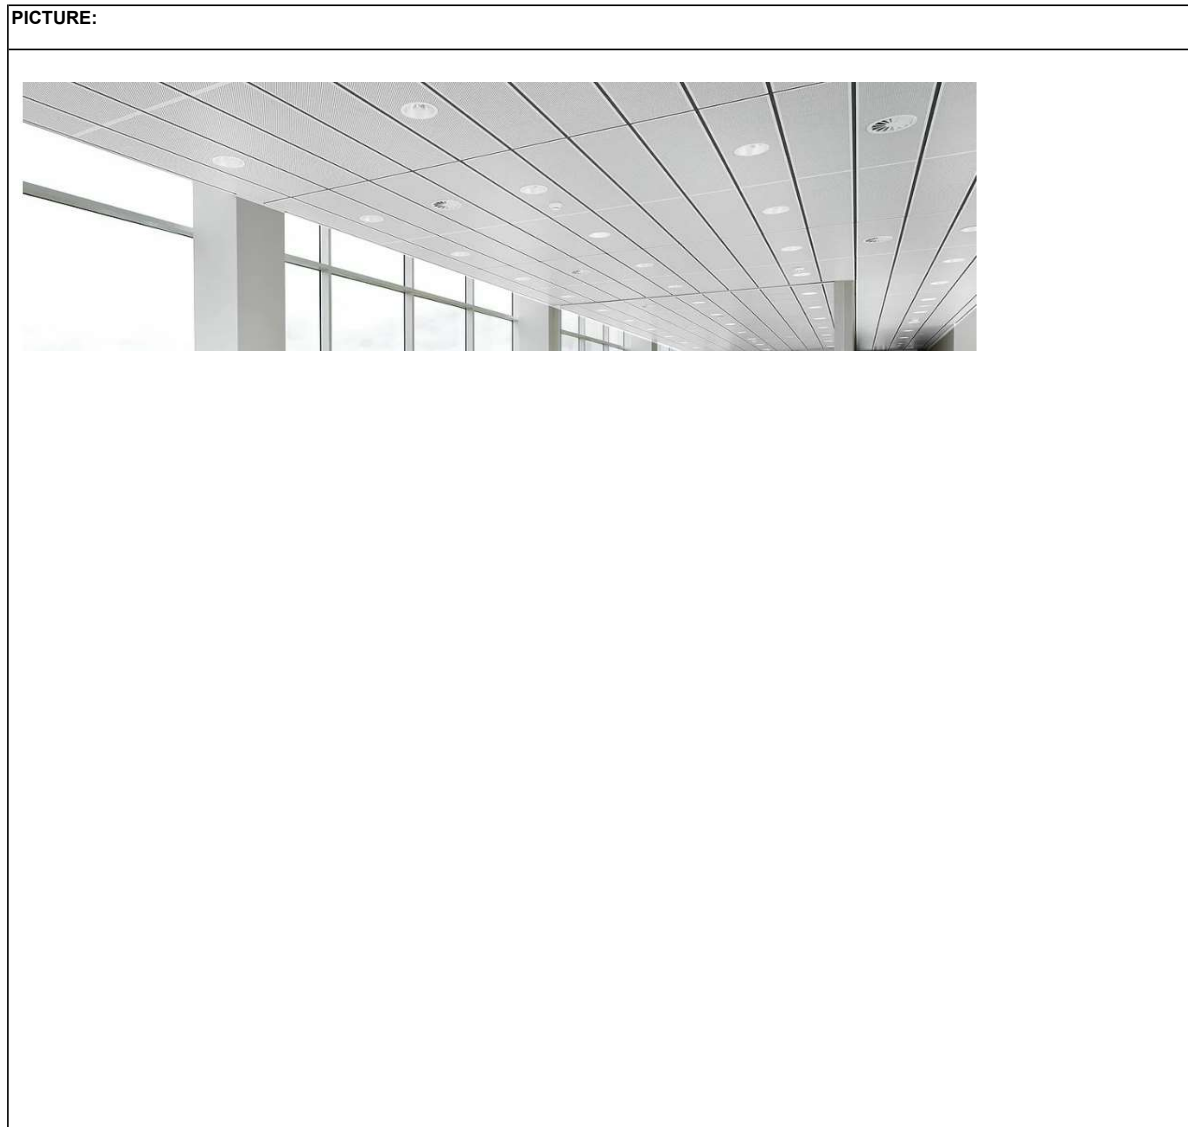

Designation	kg/m	h (mm)	b (mm)	tf (mm)	tw (mm)	r (mm)
UC15023	23.4	152	152	6.8	6.1	8.9
